---

## **Objective**

As a full stack developer, I am seeking a position with room for growth personally and professionally. My skill set allows for a wide range of roles from front-end web development to back-end database administration. I have experience working in team environments and embrace productive collaboration.

## **Work Experience**

Shift Supervisor

Chopt Creative Salad Company 2017-2020

Assisting management with the organization of workflow for upcoming shifts as well as managing inventory, schedules, and staff. Leading all operations within the store from 2-9 pm daily.

### ***Translatable skill sets***

- Management of diverse task list
  - Much like in software development, I'm comfortable tackling multiple tasks, with many moving parts and evolving deadlines, in a timely fashion to produce the required outcome.
- Personal responsibility and accountability
  - Even when working with a team, much of software development comes down to individual work, requiring that a great deal of responsibility be taken by the individual team members.
- Communicating in a way to be understood
  - Ability to break down complex tasks and features into understandable language for ease of the end-user.
- Listening in a way to understand
  - Being able to understand the end-user's vision for the product is crucial to delivering a satisfactory result.

## **Professional Skills**

- Proficient in Git conflict resolution and merging
- Proficient in web development using HTML, CSS, and Javascript
- Comfortable with MERN stack development
- Experienced with MySQL and MongoDB
- Familiar with object orientated design

### ***Additional Skills***

- Management Skills
- Interpersonal Skills
- Active Listener
- Good Communicator
- Effective Problem Solving
- Embracing Challenging Tasks

### ***Education***

George Washington University Full Stack Development Bootcamp 2020

### ***Personal Development in Progress***

Currently in pursuit of further higher education in the form of a Bachelor's Degree
